THE NATURAL, HEALTHY AND ARTISTIC CHOICE IN EDUCATION TOOLS: WOOD!

We will be in Canada and the U.S.A. in 2024 with our Pitaya Kids brand. We are entering into a new formation to serve the regions. We are proud to move our furniture factory, which has been operating for two generations since 1985, to overseas countries.

Pitaya Kids has adopted the most important properties of wood as its principle and has never compromised on these principles in any product it produces.

It is important to decide how we can play our part as Pitaya Children.

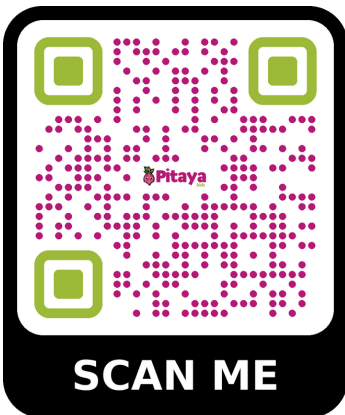

While touching on the importance of natural furniture for a healthy life, we decided that it would be more beneficial to start from the pre-school period, as it is the first age when consciousness awakens. That's why we paid great attention to this when producing our tables and chairs.

In addition to its design and ergonomics, the use of quality, durable and natural materials. As a result, we ensured that our children can safely and comfortably use tables and chairs, which play an important role in pre-school education.

As it is known, the most important features of wood as a natural material are its durability, healthiness and durability in terms of use.

In addition to these features, we can also offer specially produced products for every school with our "special collection" series. We help them make a difference in their quality and services by decorating their own logos and emblems.
